Nama: M. Romadinu Almukabir

NIM: 1415015010 Tugas Modul 8

- 1. Buat Form yang dengan minimal 5 inputan!
- 2. Jelaskan metod-metod yang ada di modul8!

Jawab:

1. Screen Shot Tampilan Awal

Screen Shot jika ingin menginput

Screenshot ketika berhasil simpan data

Screen shot ketika ingin mengedit atau menghapus

Ketika data berhasil dihapus

Ketika data berhasil diupdate

```
private void openDB(){
    try{
      Class.forName("com.mysql.jdbc.Driver");

        String sql = "DELETE FROM mahasiswa where nim=""+txtnim.getText()+"";
        statement.executeUpdate(sql);
        tbModel.removeRow(row);
        JOptionPane.showMessageDialog(this, "Data telah dihapus");
        Kosong();
        nonAktif();
      }catch(Exception ex){
        System.err.println(ex.getMessage());
      }
    }
  }
```

Source code bagian keluar

```
private void btnkeluarActionPerformed(java.awt.event.ActionE vent evt) {
    //TODO add your handling code here:
    if(JOptionPane.showConfirmDialog(this, "Apakah anda yakin ingin
    keluar?","konfirmasi",JOptionPane.YES_NO_OPTION)==0){
        Sys tem.exit(0);
    }
}
```

Source code untuk menampilkan data yang ingin diubah atau dihapus

```
private void jTable2MouseClicked(java.awt.event.MouseEvent evt) {
    //TODO add your handling code here:
    Tampil();
}
```

Source code bagian deklarasi

```
public class FormBiodata extends javax.swing.JFrame {
  private javax.swing.table.DefaultTableModel tbModel=getDefaultTableModel();
  private Connection connection;
  private Statement statement;
String data[] = new String[5];
  public FormBiodata() {
    initComponents();
    JTable2.setModel(tbModel);
    openDB();
    tampilGrid();
    tengah();
    nonAktif();
    Table(jTable2, new int[]{80,180,120,180,80});
}
```

2. Method aktif untuk membuat form aktif jika tombol tambah ditekan Method nonaktif untuk fungsi membuat form tidak aktif ketika tombol tambah belum ditekan Method openDB adalah koneksi ke databasenya Kosong untuk digunakan untuk mengkosongkan field Table untuk mengatur isi table tampilGrid() untuk menampilkan data ke table tampil untuk menampilkan data dari table ke field untuk diubah atau dihapus tengah untuk mengatur posisi table
